

Reliable & Scalable Stock Trading Application for NSE

The Challenge

The exchange believes that technology will continue to provide the necessary impetus for the organization to retain its competitive edge and ensure timeliness and satisfaction in customer service. In recognition of the fact that technology will continue to redefine the shape of the securities industry, the exchange stresses on innovation and sustained investment in technology to remain ahead of competition. With the ever increasing penetration of mobile connectivity as against internet penetration in the country, the exchange believed strongly that going mobile would assist in its above mentioned goal. Providing access to real time market information and transaction capability across all mobile devices was the requirement. One clear demand by the client was the best of breed application with a compelling user experience to ensure large scale diffusion and use of the application.
